*David Scheinbaum and Janet Russek have produced a book of lasting beauty and substance. At the heart of their endeavor lies a personal, artistic response to one of the world's great works of contemplative literature, the I Ching.*

*In this graceful book . . . this husband-wife team, both artists and longtime students of the I Ching, selected rich duotone images they shot in rural America between 1972 and 2003 to metaphorically embody the spirit of the hexagrams.*
