Scheduling & Registration

Follow these guidelines when drafting your schedule in My Schedule Planner. You will build your schedule at orientation, and it will be reviewed by your advisor at that time.

Here are some basic guidelines when building your schedule:

- If you have less than 30 credits earned, then select 100-200 level courses.
- Make sure you are in the correct level for Math, Foreign Language, and English Composition
  - If you are unsure of the right courses to take, wait to choose these until your individual advising meeting with your advisor.
- Register for about 15 credits
  - Include labs with lectures, if appropriate, and if you have the required math placement level
  - Understand the appropriate course load
- Read course descriptions to learn about the course and any prerequisites, restrictions, or permissions it may require
- Understand how to register and change your schedule
