We will apply genealogical standards to ensure your research is accurate, and have fun along the way. Using free online resources, you will hone the skills you need to bring your ancestors to life! The focus will be on US records, but the strategies can be used to "jump the pond" to your ancestral homelands.

You will need a computer or tablet; a cell phone might be difficult for accessing records.

**Marny Janson** was bitten by the genealogy bug years ago while tracing her own family back in time. She is a member of the Association of Professional Genealogists and works with clients using both historical records and DNA. OF SOCIAL ISSUES**

**WEDNESDAY Oct 20, 27, Nov 3, 10**

**9:00 – 10:30**

**PRESENTER: Judy Swallow**

**CLASS LIMIT: 10**

**Sociodrama**, first introduced by JL Moreno in 1921 as *The Living Newspaper*, allows participants to explore current events by taking on roles (suggested by the group) around a chosen social issue.

In sociodrama, people take on roles in order to understand the situation more fully from the inside out. They can reverse roles to get another viewpoint. They can deepen their *persona* to get at feelings and motivations. A sociodrama ends with people sharing how they experienced their role(s) and what they learned about that issue.

**Suggested Reading:**

## UNDERSTANDING TOTALITARIANISM

**WEDNESDAY Oct 20, 27, Nov 3, 10**

**11:00 - 12:30**

**PRESENTER: Lewis Brownstein**

We live in an age of totalitarian temptations. Beginning with the formation of the Soviet Union, followed by the rise of fascism, and then the emergence of Islamic fundamentalist states, it can be argued that the history of the 20<sup>th</sup> and 21<sup>st</sup> centuries has largely been about the impact of these regimes and struggle on the part of some to resist them.

This course will focus on the philosophical origins of these movements, the attraction they hold for so many, and sad experience mankind has had as a result of them.

One central question that will be addressed, is why totalitarian systems emerged in the 20<sup>th</sup> century in the first place. And, what are the prospects for such systems in the future.

**Lewis Brownstein** has been a frequent presenter for the Lifetime Learning Institute. He taught International Relations at SUNY, New Paltz for almost fifty years, including courses on a variety of topics including totalitarianism.

## HISTORY OF AMERICAN FURNITURE TO 1840

**WEDNESDAY Oct 20, 27, Nov 3, 10**  
**1:00 - 2:30**

**PRESENTER: Peter Kenny**

American furniture of the pre-industrial era has long been an interest of curators, collectors, and historians offering a window into the technological, cultural and socio-economic contexts of its time. But it is hardly the sole province of the historian and connoisseur. Learning about furniture design, materials, craftsmanship, and the architectural setting for which this most human of art forms was created, attunes the eyes and senses, and rewards our curiosity about the past.

The course will focus on the main periods and styles of American furniture to 1840:

***The Early Colonial Period:*** 17th-Century and William and Mary Styles

***The Late Colonial Period:*** Queen Anne and Chippendale Styles

***The Federal Period:*** Neoclassical Styles

***The Jacksonian or Early Modern Period***  
Classical and other early Revival Styles

### **Suggested Reading:**

Jonathan L. Fairbanks and Elizabeth Bidwell Bates, *American Furniture, 1620 to the Present* (New York: Richard Marke Publisher, 1981)

**Peter Kenny** had a thirty-year career at the Metropolitan Museum of Art as curator of American Decorative Arts and administrator of the American Wing. Recently retired co-president of Classical American Homes Preservation Trust. He is a forty-year resident of New Paltz,

**Nov 5, 12**

**9:00 – 10:30**

**PRESENTER: Fred Mayo**

During the Pandemic, we learned how valuable community can be for everyone. We need other people to grow and maintain our own mental health. Communities are important since they give us opportunities to connect with others, remind us that there is something greater than our own experiences, and provide meaning, safety, and security.

This topic has also grown in popularity recently (Community Choice Aggregation, Community Foundations of the Hudson Valley and Community, an American sitcom, on Netflix).

This course will examine types of communities, their importance, and ways to create and grow communities of neighbors, friends, and families.

**Fred Mayo**, Professor of Hospitality and Tourism Management, NYU – Retired, has presented LLI courses for many years. The most recent ones included Isolation (Fall,2020) and Rituals and Routines (Spring 2021).

**Nov 5, 12**

This course will be taught collaboratively with both the participants and other guest activists. Inspiring stories will be shared of successful activism and supportive resources will be offered but most importantly there will be the opportunity to learn from each other and feel empowered to take action.

Participants will learn that they don't need to know everything about an issue to speak up for what is important and needs to change.

A true activist is always striving to learn and understand more as the world continues to change. In the words of Martin Luther King Jr. "You may never know what results come of your actions, but if you do nothing, there will be no results."

Professionally, **Janelle Peotter** was a school social worker for 30 years. Now in retirement, she is volunteering as the Climate Smart Coordinator in New Paltz and serves on numerous boards. ## SCIENCE POPOURRI

FRIDAY Oct 22, 29, Nov 5, 12

1:00 – 2:30

COORDINATOR: Carole Heyl

Science encompasses a wide variety of topics. This series deals with the Past, the Present and the Future. From the beginnings of Mankind and the taming of fire to Modern Man and techniques of dealing with a global pandemic. From the Ice Age in the Hudson Valley to Exploring the Universe. From the beginning of time, man has sought the answer to the age-old question of:

*Who? What? When? Where? Why? How?*

### Oct 22: Jeremy Heyl

*Snow and the Seven Thousand White Dwarfs.* How measuring which stars are where can tell how stars collide, die and glow -- and what our future holds.

### Oct 29: Francesco Berna

*Who is Prometheus?* How and when humans started controlling fire. The biology, diet, habitat and behavior of our species are deeply entangled with the use of fire to the point that our survival is, essentially, dependent upon fire control.

### Nov 5: Bill Tuel

*The Hudson Valley During the Ice Age.* An armchair tour of the region at the end of the last Ice Age. This presentation is an adaption from "The Hudson Valley in the Ice Age" by Robert and Johanna Titus.

### Nov 12: Jennifer Anolik

*Going Rogue: The Autoimmunity and COVID Connection.* Autoimmune diseases, which occur when the immune system mistakenly attacks itself, are a common group of diseases affecting more than 24 million Americans.

**Jeremy Heyl, PhD** is a theoretical and observational astrophysicist and a Professor at the University of British Columbia's Department of Physics and Astronomy in Vancouver, Canada. His recent research has focused on compact objects: white dwarfs, neutron stars, and black holes.

**Francesco Berna, PhD** is an Associate Professor in the Department of Archeology at Simon Fraser University (Burnaby, BC, Canada) where he teaches introductory and advance courses in Archaeology. His current research focuses on the origin of modern behavior and the onset of the controlled use of fire in Africa, Europe and the Middle East.

**Bill Tuel** is a retired IBMer who has presented many Science-based courses for LLI at SUNY New Paltz as well as other LLI groups in the local area.

**Jennifer Anolik, MD, PhD** is a Professor of Medicine in the Division of Allergy, Immunology, and Rheumatology at the University of Rochester.
